Car Shipping

Call us on 0800 234 6190

Anglo Pacific is the UK's largest independent container shipping company and has been shipping cars, motor homes, motor cycles, boats and caravans around the world since 1978. Our friendly staff know the vehicle shipping process inside out so you can be sure of the best advice for the best price. We deliver our promises, so whatever your model, wherever in the world, you can be sure we'll deliver your vehicle safely, securely and on time.

Motor vehicle reception

Our reception team will complete a pre-move Condition Survey, isolate the battery in accordance with Dangerous Goods regulations, and strategically place silica gel moisture absorbent sachets in the passenger and luggage compartments. The vehicle should be in full working order and free of any mud and dirt and the fuel gauge should register empty upon delivery to our depot. We will require a copy of your registration document or Certificate of Permanent Export and your purchase invoice, as proof of ownership. Personal effects may be stowed in the luggage compartment when shipping by container service (prohibited on roll on/roll off vessels).

Storage facilities

If you are travelling en route we can arrange to store your vehicle in transit, or for longer periods, and defer shipment to coincide with your arrival. Alternatively we can arrange to store your vehicle on arrival at your destination.

Container shipment

Your vehicle will be carefully stowed within the container and separated from any household goods by a solid timber bulkhead (you pay only for the space your car occupies). Alternatively we can provide a "sole use" 20 ft container for your exclusive use. Anglo Pacific is the largest BAR shipper of motor vehicles with Maersk Line and operates to regular sailing schedules with guaranteed container allocations on every vessel. We can also arrange trailer collection throughout the UK and shipment by roll on/roll off car carrier service if you prefer.

Shipment Tracking

Our shipment tracking enables you to monitor the location and status of your vehicle. All shipping documentation can be found on our website.

Customs & Quarantine clearance

Most countries require that Motor vehicles must have been owned and used for 12 consecutive months or more preceding your departure. Before your vehicle can be imported you must obtain the necessary approval from the importing authority. Motor vehicles destined for Australia and New Zealand are subject to a physical examination by the quarantine inspection service. It is essential that the vehicle is thoroughly cleaned and vacuumed prior to shipment, paying particular attention to the wheel arches, the underside and engine compartment and interior, passenger and boot compartments. For further information please refer to our customs guides.

Marine transit insurance

We take every precaution to protect your motor vehicle during storage and transit. In addition, we can advise and arrange comprehensive insurance cover for your vehicle and will help you complete all the necessary paperwork.

Destination formalities

Our overseas partners will take care of all destination customs and quarantine formalities. Each partner has been carefully selected for their local knowledge and the quality of their destination services, and forms part of our global network of accredited FIDI specialists.

Complete financial protection

As members of the specialist Overseas Group of the British Association of Removers we are regularly assessed and are bound by the International Movers Mutual Insurance Company Limited's advance payment guarantee scheme, for your financial protection.
